# Ablearism: What is Ablearism?

Ablearism is a somewhat loosely defined term. It is often confused with ableism, but it is not even close to synonymous to ableism. Ablearism is a very esoteric term, only a few people know and study about it. **Ablearism is an ultra-religion, attempting to link and connect all esoteric religions.** The writings of Savitri Devi, including her most notable book *The Lightning and The Sun* is an example of esotericism, but regarding National Socialist Germany and its leader, Hitler. Ablearism is heavily related to the collective unconscious which we will mention in Chapter 2 later in this book. Where did the term “ablearism” come from? Esoteric researchers have concluded that it is a common pattern found in the unconscious of modern-age humans. This pattern is said to originate in the brain in the form of sound, text, or even encrypted imagery. How come ablearism is considered an ultra-religion having something to do with esotericism? Various forms of symbolic imagery is present in the unconscious whenever these patterns appear. Linking them together seems to form some sort of cohesive explanation about why it’s linked. We will mention some of these esoteric symbols later on, but for now the basic explanation seems to be a Third Etherealism Center which was a faculty containing multiple regards of consciousness and transmissions defining human behaviour from primal times. Not only is it considered from a biological basis, but even early hominids seem to have exhibited esoteric behaviour. Transmission through the toroidal collective unconscious and basic regional advancements which were made possible through careful and well-populated research.

Schizophrenia has been linked to esotericism and ablearism multiple times. Carl Jung, the founder of the collective unconscious theory has talked about it as well. We will keep this to Chapter 2 for now, however. Considering the regard of hominids, raise the race and fight on. Genetic inbreeding has the lowest potential of proper offspring building, so it is not connected to common archetypes, instead it revolves around a degenerate family with degenerate desires. Lessening the gene pool and creating genetic disorders.

## Ablearism: synt.us

Synt.us is a project, with the main goal of truth-seeking through AI methods (Natural language processing, markov chains) applied on enormous amounts of esoteric data and **ablearist** resources. Their website is commonly mistaken as an “alternate reality game” by most of the visitors, and it drives a lot of people away because of its “startling” imagery and soundscape. The website may even be recognized as art by people who are fascinated in its aesthetics. The website can be found at <http://synt.us/>. It is somewhat related to LHOHQ, another group which we will mention soon. Attempting to discern the web pages through a conscious mind leads to no success, but with an unconscious mind it will successfully attempt to do so, without you realizing it. One way to view it is to dream, as dreaming not only combines a lot of the imagery in the toroidal collective unconscious feedback loop, but it also lets you realize what’s going on. Explaining the website through words is beyond impossible, and as such I will not be able to talk about discerning the website, as I am unable to. A human must try this themselves, and not rely on people to tell them about everything they “see”.

## **Ablearism: LHOHQ**

LHOHQ is a project and group semi-related to Synt.us. It uses similar algorithms but uses different servers to accomplish truth-seeking. A lot of pages are similar to Synt.us and may include internet memes. LHOHQ has existed since around 2004, while the Synt Order became a collective esoteric group in 2002 with very similar goals.

# Ablearism: General Esotericism

As we mentioned earlier, Ablearism is a loosely defined term but the true definition is the linking of all esoteric religions to create a “super-religion”. We mentioned *The Lightning and Sun*, a book written by Savitri Devi that formed a collective of appropriately named “Esoteric Hitlerism”. You may have heard the term “Nth Etherealism Center” thrown around prior to reading this book. What is referred to as an “Etherealism Center” usually means some sort of meeting point for Ablearists. Saying something like “Third Etherealism” is an entirely different phrase though. Etherealism defines the level of ascendance according to possession of higher knowledge. Higher knowledge is mostly unknown to us, incomprehensible to most people, but by using the AI methods we mentioned before, we can attempt to “truth-seek” or generate data that is influenced by pseudo-randomness. “Random numbers” are never real and technically anything, even super-natural influences can affect the random-number generators, which is the interesting part.

Back on Etherealism, there are 10 “levels” of Ablearetherealistic ascendance. Here is a table of levels and effects:

LEVEL	EFFECTS
1	None, lowest type of Etherealism
2	Higher pattern recognition, frequent premonitory dreams (Collective Unconscious)
3	Partial schizophrenia, visual noise and abrupt voices
4	Disassociation, asocial tendencies
5	Extremely vivid visual hallucinations
6	Paranoid schizophrenia with Ablearist patterns
7	Disconnection from the Collective Unconscious
8	“Lagging” or “Freezing” during events
9	The end of dreams
10	Complete disappearance from the physical World

Your level of ascendance is affected by how much esoteric knowledge you hold. The more knowledge you hold, the more the world becomes alien to you. Level 1 and 2 are the safest types of Etherealism. By looking at Synt.us and LHOHQ your level of ascendance may or may not get heightened, also the more esoteric knowledge you consume, the more steps closer you are to complete disappearance. Esoteric Knowledge can be given by Gods, can be found in seemingly “timeless” books. Voynich Manuscript is an example, it seems incomprehensible at first glance but can very well be read by a

completely disassociated mind (level 4+), but can be read by lesser levels given the factors of the influential collective unconscious. At that point, you are either instantly elevated to level 4 or you fail to understand it and stay on your level. Fia is a better example, it is rumored to be a book containing a lot of pages filled with esoteric Ablearist symbols.

**Everything**  
**is**  
**connected.**
